IN THE SPOTLIGHT

[Social Cognition Webinar Postponed](#)

Please note: The webinar scheduled for January 26 on social cognition in schizophrenia has been postponed. We will alert you to the new date.

[SchizConnect Integrates Neuroimaging Data](#)

Do you want to explore a large neuroimaging data set of subjects with schizophrenia? Or do you have imaging data that you might like to share with such a resource? Then check out [SchizConnect](#), a new collaboration that integrates data from the [University of California, Irvine \(FBIRN\)](#); the [Mind Research Network for Neurodiagnostic Discovery \(COINS\)](#), and the [Northwestern University Feinberg School of Medicine \(NUSDAST\)](#). The mediator software was developed at the [Information Sciences Institute \(ISI\)](#) of the University of Southern California.

The project is led by Lei Wang of Northwestern, along with his co-PIs Jose Luis Ambite (USC), Steven Potkin (UCI), Jessica Turner (MRN), and David Keator (UCI). They have amassed nearly 500 cases and more than 500 controls, along with some healthy siblings, and are interested in sharing the data and expanding their database.

SRF PAPERS

Please help us create an online discussion community by picking a paper from the past week, month, or even six months, that really deserves a comment, and then writing that comment today. If you have time, sketch out your impressions in a few paragraphs, a mini-review as it were. If you only have time for the three-sentence "bottom line," that can also be valuable. On to [the papers....](#)

- January 1-7, 2016
- [December 25-31, 2015](#)
- [December 18-24, 2015](#)
- [December 11-17, 2015](#)

WHY SRF

The Schizophrenia Research Forum website was created to foster collaboration among researchers by providing an international online forum where ideas, research news, and data can be presented and discussed. Our goal is to create and maintain up-to-date content of the highest quality. The website is free of charge to users, independent of industry sponsorship, and open to the public. For those of you who just can't wait for the twice-monthly SRF newsletter, we're happy to now offer RSS, short for *Really Simple Syndication*. This technology, often termed a "feed," allows you to be alerted to new content at the Schizophrenia Research Forum website as soon as it is posted. The content in the RSS feed is the links to [news](#) and [comments](#), delivered directly to your computer.
